## 3D TESTER

◀ HOFFMANN  
(GERMANY)

1. Measurement of inner diameter and outer diameter in all 3 axes(X,Y,Z) with analogue values indicated by scale hand and quick zero setting. When measuring edge in all 3 axes(X,Y,Z) with scale hand indicating 12H, spindle axis is exactly situated at zero point of material to be cut. Calculation is not needed and there is no trial and error.
2. Wide common use : Such as functioning as calipers with single tool (Determining length, height, diameter and center)
3. Various use and quick exchange by 3 kinds of styluses : Special tool is not needed and screw doesn't need unfastening. So it is convenient and accurate plug-in fixed mechanism. (Readjustment is not needed when exchanging same styluses)
4. Max 0.01mm center is pre-adjusted before supplying.
